EXPERIENCE

Freelance Game Developer, Portland, Oregon, United States

Independent Game Developer • February 2014 – Present

Part-time Faculty, Portland Community College • August 2019 – February 2020

- Built and improved front- and back-end systems for *Be Funny Now!* a live-service multiplayer party game built with Unity and PlayFab for Steam and mobile devices
- Designed and developed *Trash the Planet*, a narrative resource-management game
 - Led a small team of designers, artists, musicians, and writers through the 18-month life cycle of the project, from a game-jam prototype to a multi-hour released product
 - Designed and programmed the full game with mechanics that evolve over time
 - Played more than 65,000 times with a 4.8/5 review average on itch.io
 - Featured on *Waypoint Radio*, *Warp Door*, *Game Curator*, *Dystopeek*, and more
- Designed ten new courses for Portland Community College's game dev curriculum
- Created *Skeal*, a micro-game that is now a "holiday tradition" at *Rock Paper Shotgun*

Booking.com, Amsterdam, the Netherlands

Software Engineer • September 2022 – July 2023

- Developed and maintained an internal strategic architecture mapping tool
 - Created front-end application using internal component and style libraries
 - Built initial prototype into a full-stack application with live data and share features
 - Established and refined UX/interaction patterns, including local and remote state management and fully custom keyboard, mouse, and trackpad controls
- Developed and prepared to launch a new homepage video carousel unit featuring dynamic social media content in order to increase engagement and boost bookings

Zapier, Portland, Oregon, United States (Remote)

Support Systems Engineering Manager • August 2020 – August 2021

- Established, hired, and managed a team of three full-stack engineers who designed, programmed, and launched key internal and user-facing tools and APIs
- Led technical systems migration from Help Scout to Zendesk; defined requirements for internal tools and APIs; launched on schedule with no downtime or outages
- Owned the team's roadmap and goals; led sprints and retros to improve efficiency

Instrument, Portland, Oregon, United States

Senior Software Engineer • November 2018 – August 2019

- Worked with clients and directors to plan, build, and ship web and VR applications
 - Developed playback, interaction, and social features for NBA and NFL VR apps
 - Developed and launched brand pages for companies like Twitch and Facebook
- Mentored junior and mid-level developers with a focus on code quality, sprint planning, and technical documentation
